

## babyTEL receives Cisco Select Partner certification

**Montreal, Quebec, Canada, Aug. 24 2010** – babyTEL, Canada’s leading independent VoIP telephone company, announced today that it has been certified as a Cisco Select Partner by Cisco Systems, Inc. (NASDAQ: CSCO) [www.cisco.com](http://www.cisco.com). babyTEL now addresses the high-level skills required to design and deploy Cisco Small/Medium Business (SMB) solutions.

“We are very excited to receive the Cisco Select Partner certification,” said Nicolas Rossignol, Vice President, Sales. “This is validation from a major networking equipment provider that we understand and support IP Telephony solutions for SMB customers. Customers can now rely on babyTEL to provide and support high quality SIP trunking solutions that work reliably across the Cisco SMB product line.”

babyTEL provides high quality Enterprise VoIP Telephony services which offer greater flexibility, more features and significant cost savings over traditional corporate telephony installations. Enterprise customers can use their existing Internet connection to connect to IP-PBX’s, thus reducing the requirement for traditional costly “land lines”.

“Being recognized by Cisco is a welcomed endorsement,” said Steve Dorsey, President & CEO of babyTEL. “Cisco and babyTEL both share a commitment to high standards and this certification is a natural evolution derived from our reputation for excellence in the enterprise market.”
