

babyTEL is awarded Canada's largest Fax Services contract for the Government of Ontario

Montreal, Quebec, Canada – August 23, 2011 – babyTEL, a leading provider of T.38 Fax over Internet Protocol (FoIP) solutions announced today that babyTEL has been awarded a contract to supply what is expected to be the largest enterprise-wide e-digital fax service in Canada. This award is guided by the Green Transformation Strategy, an ambitious plan by the Government of Ontario designed to reduce energy consumption and paper use in the Ontario Government.

babyTEL helps eliminate the need for fax machines by automatically converting inbound faxes to email attachments and allowing faxes to be sent directly from a computer. Using babyTEL will help the Government of Ontario eliminate many of the fax machines it currently uses and help contribute to its goal of reducing paper consumption by 50 per cent by 2012. These reductions will indirectly lower greenhouse emissions and reduce the environmental footprint of Ontario Government offices babyTEL is an active proponent in helping large organizations “Go Paperless” through its e-digital fax service.

babyTEL's VoIP, FoIP and e-digital fax services are leading the way in migrating enterprise communications over to the economical Internet and away from traditional costly analog fax lines. .

“We are very pleased with the e-digital fax service award by the Ontario Government,” said Stephen Dorsey, CEO, babyTEL Inc. “It's a case where a long term initiative, the Ontario Government's Green Transformation, can be implemented in a short time period and return immediate cost savings. This program should serve as a model for other governments and large corporations.”

About babyTEL

babyTEL provides residential, enterprise and social network Voice over IP (VoIP) telephony solutions in the U.S., Canada and international locations. Headquartered in Montreal, babyTEL is also a Fax over IP (FoIP) pioneer, delivering the first successful real-time FoIP solutions meeting the stringent needs of carriers, Fax Server Manufacturers and Fortune 10 companies. babyTEL is the first company to deliver a bilingual WiFi calling application for the iPod v3, iPhone and iPad.
