

Matrix Partners with babyTEL to Expands its Presence in Canadian and USA Markets

Makarpura 21st February, 2012 - Matrix ComSec, a leading manufacturer of VoIP products such as IP-PBX, IP-Servers, VoIP Gateways and IP Phones, announced the successful completion of interoperability testing with babyTEL SIP Trunking services. Matrix ComSec has developed a comprehensive range of IP-PBX and VoIP Gateways to suit the requirements of small businesses and large enterprises.

“This compliance of babyTEL SIP Trunking services with Matrix VoIP gateways will help Matrix to strengthen its position among Canada and USA based small businesses and large enterprises.” said Sajeev Nair, Manager-Product Management for Matrix ComSec.

“Matrix has a range of VoIP gateways loaded with the set of advance features that help businesses to save over telephony cost, offer mobility and flexibility to remote staff and increase productivity and efficiency.” continued Sajeev Nair.

babyTEL’s SIP Trunking and T.38 services for local and long distance calling include extra services such as DID with E911, Toll-Free Numbers, Local Number Portability (LNP) and other additional standard and innovative features. “We are very excited to have our SIP Trunking services certified for interoperability with Matrix ComSec,” said Stephen Dorsey, CEO, babyTEL Inc. “This interoperability of this SIP Trunking suite will help babyTEL customers and distribution partners to experience the enterprise quality and reliability with their calling activities.”

About babyTEL Inc.

Within its Technology as a Service (TaaS) framework, babyTEL develops advanced communication technologies to provide cutting-edge voice communication services. babyTEL provides feature rich VoIP home phone, business phone, SIP Trunking, mobile and fax services through its Agent and Reseller network in over 7000 locations in the USA and Canada with Social Network services available world-wide. To meet challenging and expanding customer needs, babyTEL customizes its residential and corporate telephony services in-house using its own development resources. babyTEL customer and network support teams benefit from the availability of in-house developers to offer customers more effective and timely support.
